

Datasheet BH2-4000PSI

Dead weight tester - Hi-tech / Hydraulic

P = F/S

✓ Applications

This primary standard Range are designed to test, adjust and calibrate measuring instruments, mechanical or electronic pressure by comparison (pressure gauges, pressure transmitters or sensors or switches)

The dead weight tester consist of a pressure generator, a piston/cylinder unit, a set of weigh identified. The capstan is used to generate a pressure pushing the fluid through the piston. This pressure is balanced by the piston/cylinder assembly which allows to compare the instrument to be calibrated to the pressure values generated by the standard.

This reference instrument are used in factory or calibration laboratory. They are robust and easy to use and have a high long-term stability.

✓ Technical specifications of the range BH2

- Calibration : Our dead weight tester are calibrated under the following conditions of use :

Temperature 20°C - Pressure atmos. 1013.25 hPa - Humidity 50% - acceleration 9.80665 m/s^2) In case you don't use it under the conditions mentioned above, it is necessary to recalculate the

pressure generated by the dead weight according to the different variables.

- Fluid: Mineral or synthetic oil depending on model, colorless, compatible with medical or food uses –

tank volume 125 cm³

- Check/adjust the seat : leveling bubble and adjustable feet

- Connecting for the instrument to be tested : swivel G1/2 standard – other optional fittings

- Rotating weight: Manual rotation of weights (or motorized if option OP0004 or OP0301)

Crankcase: Light alloy aluminium AG3 + high-resistance paint

- Capstan : removable for transport

- **Piston/cylinder**: Single or twin piston tungsten carbide and/or treated steel - **Repeatability**: 5.10-5 -

Sensitivity: 2.10-5 - Precision dead weight: 10-4

- Weight: stainless steel - Total weight of the set of weights from 25 kg to 100 kg depending on model -

Ergonomic shape of the masses, easy loading of the masses on the bell - Marking

corresponding with the measuring unit choose (bar, mbar, KPa, PSI etc..) **Gravity**: standard (9.80665 m/s²) or local gravity without supplement

- Operating temperature: 18 to 28°C – 64 to 82°F

✓ Technical product specifications

- Model: BH2-40000PSI - dead weight single piston

- Measuring range : 600 to 40200 PSI

- Accuracy: 0.02% of reading, up to 0.006% on request

- Weight dead weight without masses : 22 kg / 24 kg if option OP0004 or OP0301

- Fluid :

- Material Piston/Cylinder : P = tungsten carbide / C = tungsten carbide

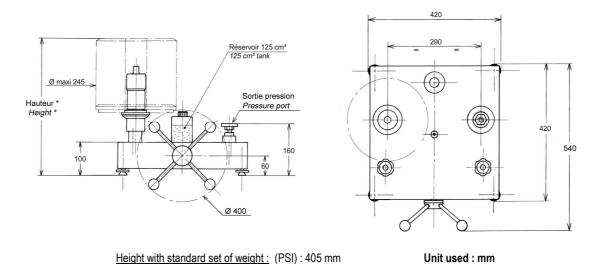

Oil

- Number of piston :

- Unit supplied with : Operating instructions / AREMECA calibration certificate traceable to national standards / unit data sheet / 0.5 liter mineral oil / G1/2 outlet connector / tools

Note: All our documents can be delivered in English, French or German.

✓ Standard device dimensions

CHOOSING OPTIONS

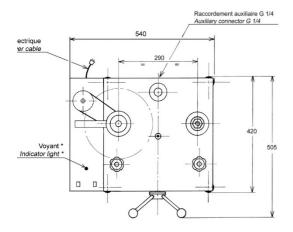

- ☑ Gravitation option OFFERED:: we will adjust your weight set to the standard or special G (give us the desired value).
- ☑ Unit option OFFERED : choose the unit of the main weight set (e.g. PSI, BAR, Kg/cm²...) delivered with the DWT
- ☐ Intermediate weight set option : the intermediate weight set is offered as an option, the unit will be the same as the one selected for the main weight set.

Standard set			
	Pressure (PSI)	Total weight	Typical value (g)
	4000	8	5520
Unit : PSI	3400	1	4968
(Ref. MB0056)	2000	1	2760
	800	2	1104
	400	1	552
	200	1	276
Pressure Weight bell	600		828
TOTAL	40200	14	±55 ka

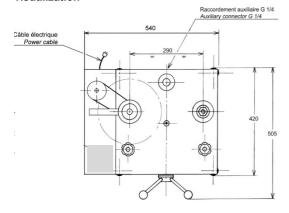

Intermediate set in option				
	Pressure (PSI)	Total weight	Typical value (g)	
	80	2	110.4	
PSI (Ref. MB0059)	40	1	55.2	
	20	1	27.6	
	8	2	11	
	4	1	5.5	
	2	1	2.75	
TOTAL	242	8	333.85 g	

Other units are available on request

☐ Option OP0004 : Motorization / LED display kit

☐ Option OP0301 : calculator + sensors + motorization / visualization

This option enhances the scale's functionality with:

- an automatic weight set motorization, which ensures regular rotation
 of the weights, avoids jolts on the piston, limits operator handling and
 improves scale stability during measurements
- a position sensor that displays the position of the piston. The operator
 can easily check that the balance is in equilibrium simply by checking
 the LED display, and no longer needs to check that the DWT is
 floating under the weight pan.

This option ensures traceability of your measurements and integrates numerous functions::

- automatic display of pressures generated by the DWT as a function of temperature and atmospheric pressure
- · weight set motorization
- bargraph display of piston position
- · unit conversion capability
- operator assistance in the measurement process
- data transfer to computer for full traceability and calibration certificate.

☐ Carrying case option :

Ref OP0101 - Metal box for mass transport

Dimensions: 260 x 260 x 310 mm - unloaded weight: 6 kg 7 weights max per box

Ref OP0257 - carrying case for the masses

Workstation layout :

large: $355 \times 505 \times 310$ mm - empty weight: 13 kg small: $290 \times 250 \times 310$ mm - empty weight: 5 kg

1 or more boxes will be necessary depending on your DWT – Consult us!

Ref OP0002 - Transport case for the balance or comparison bench.

(BH5 or CH3 models contact us!)

Ref OP0057 Accessories suitcase
Ref OP0025 drain kit for oil
ref OP0037 Suitcase with 17 adaptors type M + G + NPT + BSP-TR / Pressure max 1200 bar
Ref OP0062 Cleaning bench
Ref OP00220 high adaptors M16x150
Ref OP0194 fine valve

✓ Transport and packaging

Designation/Reference	Dimension / carton or shipping crate	total weight (packaging + materiel)
Wooden over-wrapping		(DWT + set of weights + cardboard packaging)
DWT without options or accessories	79 x 48 x 34 cm	Total weight ±100 kg
If option	98 x 70 x 50 cm	Total weight to be defined

- Note: Shipping is extra. Size may vary if accessories are purchased with the unit.

√ Other models available in the range BH2
